

# GASTON COUNTY REZONING APPLICATION (CD22-03)

## STAFF REPORT

### APPLICATION SUMMARY

**Request:**

To conditionally rezone a portion of Parcel ID 183034 from the (RS-20) Single Family 20,000 sqft. zoning district with Urban Standards overlay to the (C-1) Light Commercial zoning district with Urban Standards overlay.

**Applicant(s):**

TowerCo 2013 LLC

**Property Owner(s):**

Lance and Kelly Theobald

**Parcel Identification (PID):**

183034

**Property Location:**

906 Pinhook Loop Rd.

**Total Property Acreage:**

23.8 acres

**Acreage for Map Change:**

.23 acre

**Current Zoning:**

(RS-20) Single Family 20,000 sqft. with Urban Standards Overlay

**Proposed Zoning:**

(CD/C-1) Conditional District Light Commercial with Urban Standards Overlay

**Existing Land Use:**

The portion that is included in the rezoning area is currently vacant. There is a single-family residential structure being constructed on the southern portion of the lot.

**Proposed Land Use:**

Telecommunication Tower – 250' lattice design tower with a 6' lightning rod for a total of 256' tall structure

### COMPREHENSIVE LAND USE PLAN

**Small Area Designation: Northeast Riverfront Gaston**

The Riverfront Gaston area has large pockets of rural and suburban development future land use areas. The Comprehensive Land Use plan envisions the suburban development area west of Mount Holly to be supportive of the growth expected in Stanley, Mount Holly, Lowell, and McAdenville.

Key issues for citizens in this area include:

- Preservation of open space
- Road improvements and better connectivity to other areas of the region
- Increased job opportunities
- Maintaining the rural “feel” of the area
- Increased commercial opportunities

**Future Land Use: Suburban Development**

The Suburban Development land use was placed around commercial pockets that represent a standard suburban center. Suburban centers can include multi-family houses and support services. These areas are larger than rural centers and tend to not serve a significant city or commercial purpose aside from immediate neighborhood needs.

**Staff Recommendation:**

Staff finds that the application as presented is consistent with the Comprehensive Land Use Plan as:

- The proposed site plan and leased area will have minimal site clearing, leading to a preservation of open space
- The proposed use will increase an essential service to the area which can allow for increased commercial opportunities that would allow the area to be more of a suburban development
- The proposed use is considered a support service that will support the immediate neighborhood needs

## UTILITIES AND ROAD NETWORK INFRASTRUCTURE

### Water/Sewer Provider:

Private well / septic is in site for the residential house under construction – no water/sewer utilities are included in the site plan for the telecommunication tower

### Road Maintenance:

Pinhook Loop Road is a NCDOT owned/maintained road – the site will have access by a 30' easement as shown on page C-1, C-2, and C-2.1 (See Figure 1)

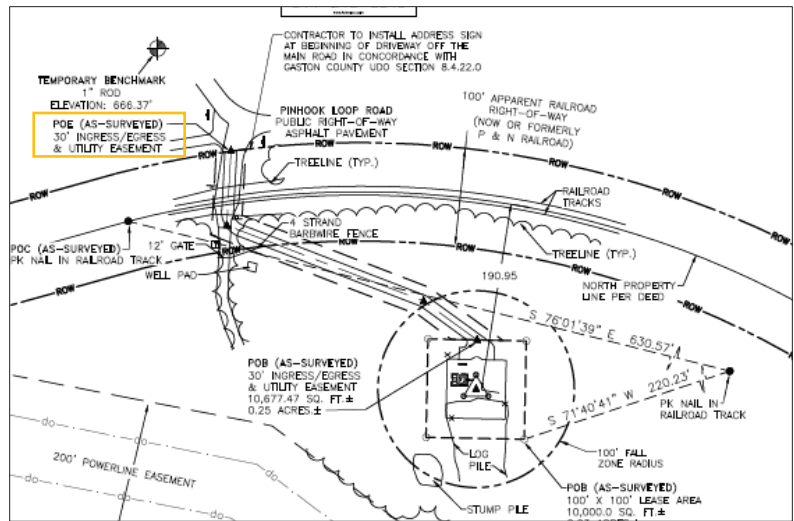

Figure 1: Taken from page C-1 of the Submitted Site Plan

### Technical Review Committee (TRC) comments:

The original site plan was shared with the TRC on April 1, 2022. Staff received comments from Emergency Management and the Gaston Cleveland Lincoln Metropolitan Planning Organization (GCLMPO).

Comments from Emergency Management:

1. Access roads must meet the minimum requirements of Appendix D of the NC Fire Code.
2. The distance between the gate and railroad allow for a safe distance of fire apparatus to clear the tracks to access the gate.
3. Permits may be required depending on the fuel type of the generator.

Comments from the GCLMPO:

1. There are no funded transportation projects in the immediate vicinity or to adjacent streets of this subject property on the State or Comprehensive Transportation Plans. (STIP and CTP)
2. The P&N Rail Corridor has been identified as a future high capacity transit corridor and has been studied for a commuter rail. This project is unfunded and additional study is needed.
3. The CTP shows recommended multi-use path improvements along the P&N Railway.
4. Any new driveways will require a permit from NCDOT.

## STAFF SUMMARY

**Prepared By: Jamie Mendoza Kanburoglu, Long Range Planner**

**Background:** AT&T's antennas are currently located on a Crown Castle 195-foot tower that is located approx. .75 miles from the proposed site. (TowerCo – Project Narrative) The property owner of the current tower has decided to not renew the ground lease for the tower, so AT&T needs to construct a new tower in order to maintain service coverage for the area. The proposed tower will allow AT&T to relocate their antennas and provide other companies the opportunity collocate on the proposed tower. The proposed telecommunication tower is 250' in height with a 6' lightening rod on the top.

**Area:** TowerCo is requesting to construct this new tower in a leased space on parcel ID 183034 that will be 100' x 100'. The lot is currently vacant, and the lease area is staked out. (See Figure 2)

**Zoning:** The leased area is on a lot that is zoned (RS-20) with US Overlay. The owner of the lot is in the process of building a residential structure on the southern portion of the lot. The applicant is requesting to rezone to (C-1) Light commercial as it is the most restricted commercial zoning district meant to be found near residential areas and allows telecommunication towers by Special Use Permit. Since the applicant is going through the conditional the conditional rezoning process for this project, the proposed site plan will be approved with the conditional district and a Special Use Permit will not be required. While the subject parcel is within the US Overlay district, the regulations and standards in the UD overlay are not applicable to this type of project. US Overlay regulations are focused on parking lots, building design and colors, rooftop equipment, sidewalks, and other features typically found in a subdivision or commercial project near residential pockets.

**Site Plan:** Since this request is for a conditional rezoning, a site plan must be approved and adopted with the rezoning. A copy of the site plan has been included with this staff report. Below is a breakdown of what the UDO requires and what is being proposed in the site plan.

Regulation	Required	Proposed	Staff Comments
Tower Height (Section 9.15.D)	Max. height of 199.9'	250' tower with 6' lightening rod at the top	Section 8.4.22 states the max. allowable height of a tower is 199.9 feet. Increases may be granted if the applicant can prove the maximum height will not provide an adequate service level.
Tower Location (Section 8.4.22.D)	Tower shall be located in the rear yard if there is an existing principal use on the lot.	Lease site is in the front yard and approx. 500' from the residential structure that is under construction.	Th proposed site is being leased from the property owner who is in the process of constructing a single-family house on the southern portion of the lot.
Landscape Buffer (Sections 8.4.22.H and 11.3)	Type B Buffer with a five (5) ft. planting strip	No landscape buffer	The location of the leased area is surrounded by wooded area as can be seen in Figure 2 and the 2022 aerial photography in the map provided by staff. A landscape buffer would not serve any purpose at the proposed location. The applicant has agreed to install a landscape buffer if the owner decides to grade and clear their lot. Staff is recommending that this stipulation be included as a condition of approval.
Structure Type (Section 8.4.22.A)	Monopole Design	Lattice Design	Monopole towers are allowed by right in (C-3), (I-1), (I-2), and (I-3) zoning districts. Telecommunication towers, as defined in Chapter 2, including lattice design structures are allowed in all commercial and industrial zoning districts by special use permit. Since the applicant is going through a conditional rezoning request, they will not have to seek a special use permit.

			The UDO states in Section 8.4.22 that in all commercial and industrial zoning districts, a monopole design is preferred by the county. However, if the applicant can demonstrate that a monopole cannot provide adequate service or structural integrity, then a lattice construction steel structure tower is acceptable.
Setbacks (Section 8.4.22.I)	192'	Survey shows a 190.95' setback from the tower to the centerline of the railroad right-of-way	The County's ordinance measures setbacks to the road right-of-way so the setback requirement is satisfied.

**Public Information Meetings:** The applicant held two (2) Public Information Meetings at the site. The first meeting was held on Monday, May 16<sup>th</sup> and the second meeting was held on Wednesday, May 18<sup>th</sup>. Staff attended along with representatives from TowerCo and Fox Rothschild, the law office overseeing the rezoning process. There were no other attendants.

**Draft Conditions of Approval:** Staff recommends that the site plan and rezoning request be recommended for approval/approved with the following conditions:

1. The proposed development shall be in compliance with the Gaston County UDO with the following reliefs:
  - a. Tower height of 250' with a 6' lightening pole at the top
  - b. Tower may be located in the side yard of the primary residential structure on the lot.
  - c. No landscape buffer required unless the owner grades or clears their lot.
  - d. A lattice structure matching what has been provided in the approved site plan shall be permitted.
2. Any major changes to the site plan, including an increase in the height of the tower, will require an amendment to the conditional district.
3. Application for colocations shall be permitted by-right so long as the tower height is not increased.
4. Gravel access road shall be maintained quarterly per the maintenance agreement on file with the Building and Development Services Department and meet the minimum requirements of Appendix D of the NC Fire Code at all times.
5. Applicant (TowerCo) shall install the required landscape buffer should the property owner choose to grade/clear their lot.
6. Upon abandonment, the telecommunication tower and all accessory structures shall be removed by the applicant in accordance with Section 8.4.22.L of the UDO.
7. Applicant shall coordinate with Duke Energy and NCDOT as required and obtain all necessary building permits.
8. The conditional zoning site plan approval shall be valid for a period of 24 months.

**Section 2: Outdoor Cabinet Site Signage**

Outdoor sites require the same gate and no trespassing signs as indoor sites if owned by AT&T. In place of the door sign the cabinets must have the following signs:

- Single cabinet sites require a sign, such as a door sign, that indicates AT&T as the owner and has provisions for adding the site number along with the MNRC contact number.
  - Sign must be affixed to the side of the cabinet (front, rear or side) which is most visible when approaching the cabinet from the site access point
    - 8" x 12" decal acceptable for outdoor cabinet

- Multiple cabinet sites require the sign specified in the previous bullet attached to the side of each cabinet on the end of the lineup. In addition, a sign indicating AT&T as the owner must be affixed to the front or rear of every cabinet (not both).
  - AT&T identification sign is to be affixed to the most visible area (front or rear) when approaching the cabinets from the site access point
    - 3" x 6.5" decal acceptable for front or rear of outdoor cabinets

- Example of AT&T identification signs on outdoor cabinets (signs on each end of lineup not shown but are required)

- Diesel generators installed outdoors**, such as on a pad in a compound, shall have signs affixed to the tank on **both of the long sides** of the generator. For belly tank style generators, if signs will not properly adhere to the tank they may be installed on the generator housing (alternate locations shown in yellow boxes below)
  - AT&T identification sign, 8" x 12" or 3" x 6.5"
  - Hazard diamond sign, 15" x 15" with 6" numbers (1-2-0)
  - Yellow EH&S sign, approximately 10" x 10"
  - Diesel Fuel, Combustible, No Smoking (Excel combination sign is recommended)

**Note:** for stand-alone tank style generators (not belly tank) the only required sign on the generator itself is the AT&T identification sign. All 4 signs listed above will be installed on the stand-alone fuel tank

**Belly Type Tank Style Generator**

**NOTE:** If ribs on the generator tank do not allow enough room to place signs, it is acceptable to affix the signs to the generator housing

**Stand-alone Type Tank Style****Section 3: Fixed Generator Signage (continued)**

Per AT&T EH&S, fixed generators are required to have the following signage:

- AT&T identification sign, 8" x 12" or 3" x 6.5"
