

GEMS Coronavirus Phase 4 Provider Relief Funds Proposed Project Crosswalk

Allowable Uses	Project	Explanation	Cost
Mitigation and Prevention:			
Isolation and Quarantine; and, Access to care by vulnerable populations; and, Alternate care facilities	Field Shelters	Collaborating with Public Health and Social Services, we propose to purchase the hub and first two wings of field shelters to have available for deployment in circumstances such as the need for a field hospital, a quarantine facility, a warming shelter, and a care site. In additional, the shelters can also be used for disaster medical services in the event of major incidents. These shelters will also mate up to those being purchased by the Metrolina Healthcare Preparedness Coalition, which would allow theirs to be used in conjunction with ours, and vice versa. Further, parts of these shelters will be utilized to facilitate field care at homeless camps. Costs reflect the mission ready packages of the hub and two wings.	\$148,092
Isolation and Quarantine; and, Access to care by vulnerable populations; and, Alternate care facilities	Shelter trailer	Collaborating with Public Health and Social Services, we propose to purchase a trailer to store, haul, and rapidly deploy the field shelters wherever and whenever needed. Costs reflect trailer, painting, and decals.	\$54,000
Isolation and Quarantine; and, Access to care by vulnerable populations; and, Alternate care facilities	Tow vehicle	Collaborating with Public Health, Social Services, and Hope United Survivor Network, we propose to purchase a tow vehicle for the shelter trailer to be able to rapidly deploy the shelters wherever and whenever needed, and also to tow the upfitted former Community Policing trailer help facilitate outreach to neighborhood health education events, and also to help facilitate outreach to domestic violence victims with information about available services, as well as consultation in unobtrusive locations. Costs reflect cost of vehicle, commercial body, painting, decals, and radio.	\$96,000

Behavioral Health Care:			
Enhanced needs exacerbated by pandemic	Therapy dog	Collaborating with other first responder agencies, we have built and proven a notable and awarded therapy dog program utilizing privately owned Great Danes. To take this to the next level, we propose to purchase, train, and certify a Labradoodle therapy dog, and a handler. This will allow us to better address the behavioral health care needs of local and regional first responders affected by the pandemic. Costs reflect cost of dog, dog training, and handler (existing staff) training.	\$12,000
Enhanced needs exacerbated by pandemic	Peer Support Team training	Collaborating with the Metrolina Healthcare Preparedness Coalition, we propose to host Peer Support Team training and develop a small Peer Support Team. This will allow us to better address the behavioral health care needs of local and regional first responders affected by the pandemic. Costs reflect cost of training the team.	\$10,000
Address Disparities in Public Health Outcomes:			
Facilitate access to resources that improve health outcomes	Wheelchair and Transport van	Collaborating with Public Health and Social Services, we propose to purchase and deploy a wheelchair lift equipped transport van to help fill a gap in access to services. We already transport people who are too large for ACCESS personnel to handle by themselves, even if the patient does not really need an ambulance. We already transport COVID positive patients to get them to dialysis, even when the patient does not otherwise need an ambulance. This van would allow us to have a resource for use at all times. In addition, this van would be utilized to facilitate field care to homeless camps by transporting equipment and personnel to various sites.	\$75,500
Facilitate access to resources that improve health outcomes	Community Outreach using trailer	Collaborating with Public Health, we will utilize the upfitted former Community Policing trailer and a tow vehicle to reach out to neighborhoods with information about available services, as well as vaccinations and consultations. This is an additional use of the tow vehicle listed above.	\$0
Community Violence Intervention Programs	Community Outreach using trailer	Collaborating with Hope United Survivor Network, we will utilize the upfitted former Community Policing trailer and a tow vehicle to reach out to victims with information about available services, as well as consultation in unobtrusive locations. This is an additional use of the tow vehicle listed above.	\$0
Total			\$395,592
