To complete the Residual Risk, after obtaining/reviewing the control items, as the question "What is the probability (description)...? What would be the impact? Choose the risk level from the dropdown list.

Assess the risk after the control items have been obtained. The risk should be lower than the inherent. If not, the results will be the same. The total number of risks from your Residual Count should be your "Overall Risk". Use the dropdown on the "ARPA risk" template in the upperight to indicate "Overall" level of risk.
